

SYED MOHSIN

FORWARD DEPLOYMENT ENGINEER (FDE) | AUTOMATION ARCHITECT | AI ARCHITECT

Bloomfield, CT | 217-761-6372 | mohsin.sma0105@gmail.com | linkedin.com/in/syedm0105

PROFESSIONAL SUMMARY

Forward Deployment Engineer (FDE), Automation Architect, and AI Architect with 10+ years of technology delivery experience, including 9+ years in U.S. enterprise environments. Works directly with business teams, operations leaders, and engineers to discover complex workflows, translate requirements into practical architectures, modernize automation portfolios, deploy solutions to production, drive adoption, and support continuous improvement. Domain depth across healthcare payer operations, banking, fraud/AML, mortgage, and utilities; contributed to \$100M+ in business value and up to 40% reduction in manual processing.

CORE CAPABILITIES

Forward Deployment: Discovery, process mapping, stakeholder workshops, rapid prototyping, adoption, hypercare, production support

Automation Architecture & AI: UiPath platform design, multi-tool migration to UiPath, Agentic AI patterns, Autopilot, AI Center, UiPath Apps, Pega Robotics/OpenSpan, Blue Prism, Automation Anywhere

Architecture & Delivery: Solution architecture, SDLC, testing, release readiness, deployment, reusable frameworks, technical leadership

Engineering & Domains: C#, VB.NET, SQL, APIs, mainframe, web/desktop apps; healthcare claims, banking, mortgage, fraud/AML, utilities

PROFESSIONAL EXPERIENCE

Forward Deployment Engineer (FDE) / Automation Architect / AI Architect | Major U.S. Health Payer Client · Virtusa

Feb 2020 - Present | Bloomfield, CT

- Embedded with healthcare operations, business stakeholders, and engineering teams to map payer workflows from claim intake through eligibility, benefits, provider validation, pricing, adjudication support, and exception handling.
- Architected and deployed enterprise automation contributing to \$100M+ in business value and up to 40% reduction in manual processing across claims and eligibility workflows.
- Owned solution design, implementation, testing, release readiness, production rollout, hypercare, and continuous improvement using UiPath, Agentic AI patterns, Autopilot, C#, and enterprise integrations.
- Led enterprise migration of automation projects from Pega Robotics/OpenSpan, Blue Prism, Automation Anywhere, and other legacy tools to UiPath; established assessment, conversion, reusable architecture, testing, release, hypercare, and production-support standards.

Senior RPA Developer | Anthem Inc.

Jun 2018 - Dec

2019 | Norfolk, VA

- Partnered with business and application teams to automate ACMS-related workflows and support migration from legacy applications to Pega-based solutions across IBM mainframe, web, web services, Office, PDF, and SQL Server.
- Supported deployment and production operations for a large DaaS user environment using SourceTree and Bitbucket.

RPA Lead | Southern California Edison

Mar 2018 - Jul

2018 | Los Angeles, CA

- Led stakeholder discovery and translated operational requirements into attended and unattended automation designs using Pega Robotics, Windows adapters, and Microsoft App-V; implemented TFS/OMC integration and deployment practices.

RPA Tech Lead | SunTrust Bank · Infosys

Mar 2017 - Feb

2018 | Atlanta, GA

- Led six end-to-end mortgage, fraud, and AML automations across Salesforce, Equifax, Lending Space, mainframe, web, and Windows applications; created reusable frameworks, PDD/SDD artifacts, exception handling, and scalability tests.

SELECTED IMPACT

Healthcare Claims & Eligibility: Designed production workflows across intake, eligibility, provider, benefits, pricing, documents, and exceptions. **UiPath Modernization:** Migrated portfolios from Pega Robotics/OpenSpan, Blue Prism, Automation Anywhere, and other legacy tools to UiPath. **Banking Automation:** Delivered six end-to-end mortgage, fraud, and AML processes.
